Experience the next generation of **simpler** and **more affordable** home automation.

# Top 5 things that *matter*

## Personalisation

KASTA Technologies enables homeowners to adjust and experiment with the automation in their home until it's just right. No need to contract an expensive professional just to come and adjust the smallest setting anymore.

## A tactile experience

All the special functions of your smart home can be stored within a KASTA Technologies smart wall switch. This means that anyone of any age or technology skill can control their home even without a smart phone, tablet or voice control speaker.

## Voice control

Control the automation of your home by using just your voice with KASTA Technologies.

“Alexa, I'm home.”

“OK Google, I'm leaving.”

## Always connected to your home

From being able to view your house or apartment status and adjust your home settings on the fly to being able to open or close the garage, unlock the front door and even turn the lights and powerpoints on/off from your mobile device or tablet anywhere in the world.

## Peace of mind

Enjoy peace of mind and a sense of security with KASTA Technologies by scheduling the control of lighting and blinds when away from home and controlling your front gates and doors with integrated motion sensors.

KASTA Technologies allows for seamless home integration and the ability to grow your home controls at any time you desire. All our smart controls are completely modular and IoT ready.

Based on wireless technology with no additional cabling, our home automation controls can be easily installed and programmed by your local electrician, saving you on time and cost.

We make sure that exceptional home automation experience does not compromise on aesthetical sophistication. Our architectural range of smart switches and electrical accessories are specially designed to compliment the home interior.

An Australian company with local R&D, we provide comprehensive customer support and innovative technology with outstanding quality and trustworthy reliability.

KASTA Technologies is backed by a 3 year warranty.

## Create *atmosphere* and *scene settings*.

### Relax & unwind

Bath lights  
60% Dim

Heat lamp  
ON

Mirror strip lights  
40% Dim

### Movie time

TV
